Routers

Manage your network routers and VPN connections
+add new router(

Add Router

Access Code *

Default access code is required to add new routers

Router Name * 3-30 characters, alphanumeric with - and _ only

VPN Configuration Mode *

Hybrid Mode Recommended

WireGuard: Primary VPN for all customer traffic (fast & efficient) **OpenVPN:** Management tunnel with port forwarding (Winbox/WebFig)

Best of both worlds

WireGuard Only

Fast & modern protocolLightweight VPNDirect IP access

OpenVPN Only

Traditional VPNPort forwardingWide compatibility

Hybrid Mode: Uses WireGuard for all customer VPN traffic (fast performance) and OpenVPN for management access with port forwarding (easy remote access to Winbox/WebFig). This provides optimal performance while maintaining convenient management access.

Description (Optional)

Initial Status

Enable

Disable

You can enable the router after initial setup

Note: After creation, you'll receive setup instructions and configuration files. Make sure to save all credentials securely.

Cancel. Create router
